Starter Generators | StarterGenerator.com®

A starter generator is a combination of two different engine components. The component can be found in lawn tractors, garden tractors and aircraft. The starter component generates the initial ignition, starting the vehicle, and the generator maintains the voltage while the vehicle is being operated. Video of the Day

The purpose of a starter generator is to crank the aircraft engine or APU system up to a specified RPM to start the aircraft. Once a specified RPM is reached, it then switches from the starting process to the generating process. The generator then provides power through a voltage control unit to the battery and other aircraft components.

Aircraft Starter Generator | Aircraft Accessories

The Hucks starter (invented by Bentfield Hucks during WWI) is a mechanical replacement for the ground crew. Based on a vehicle chassis the device uses a clutch driven shaft to turn the propeller, disengaging as the engine starts. A Hucks starter is used regularly at the Shuttleworth Collection for starting period aircraft.. Pull cord
