The D5100 is a smaller and (we think) more attractive camera than its predecessor the D5000. It is less bulbous, and closer to the D3100 and D7000 in terms of styling. The most significant design difference is the addition of a side-hinging LCD screen in the D5100, as opposed to the bulkier (and more awkward) bottom-hinged LCD used in the D5000.

The Nikon D90 is a 12.3 megapixel digital single-lens reflex camera (DSLR) model announced by Nikon on August 27, 2008. It is a prosumer model that replaces the Nikon D80, fitting between the company's entry-level and professional DSLR models. It has a Nikon DX format crop sensor.. Nikon gave the D90's Estimated Selling Price in the United States as US\$899.95 for the body alone and as \$1299.99 ...

Nikon D90 - Wikipedia

This is a general guide. There will be some oddball items not covered. For these, always read your owners manual or ask Nikon USA at (800) NIKON-UX (digital) or (800) NIKON-US (film). When a camera or lens is introduced, of course its manual can't talk about compatibility with future products.

Nikon Lens Compatibility - Ken Rockwell

The Nikon D700 is a professional-grade full-frame digital single-lens reflex camera introduced by the Nikon Corporation in July 2008 and manufactured in Japan. It uses the same 12.1-megapixel "FX" CMOS image sensor as the Nikon D3, and is Nikon's second full-frame digital SLR camera.. The D700's full-frame sensor allows the use of F-mount (FX) lenses to their fullest advantage, with almost no ...

Nikon D700 - Wikipedia

The Nikon AI lens mount has a mechanical linkage to report the maximum aperture of the lens to film camera bodies, but the digital bodies do not use it. Instead, you must set the focal length and maximum aperture of the lens manually, using the camera's menu system to input "Non-CPU Lens Data".

Using Manual Focus Lenses on Nikon DSLR Cameras
