Note questions with a name can also be omitted from the feature layer by setting `bind::esri:fieldType` to null. If a note has no name, no field is generated for the note in the feature layer. It acts only to store and display read-only text. The note question will be shown in the Schema Preview with a `generated_note_` prefix and a null field type.

Creating a Notes/Domino database for a survey or questionnaire is an effective and frequently used approach. It's especially useful when you have a complex survey and/or a large number of respondents because you can use the database's features (documents, views, agents, and so on) to collect and analyze the responses.
