### Trigger Points and Muscle Chains - Osteopathie Hebgen

"Myofascial trigger points, also known as trigger points, trigger sites, or muscle knots, are hyperirritable spots in the fascia surrounding skeletal muscle. They are associated with palpable nodules in taut bands of muscle fibres." For most of us, this definition will leave us scratching our heads in confusion.

### Your Ultimate Trigger Point Guide | Wizard Of Health

Did you know that muscle trigger points, or more commonly called Muscle Knots, are responsible for up to 80% of all muscle pain? They may be the single reason why most of the treatments you've tried in the past didn't work.

### 5 Mistakes You're Making In Treating Your Muscle Trigger ...

Trigger points may be caused by the constant contraction of your muscle. Moreover, trigger points can be really tricky because of how it causes pain. Trigger points, in most cases, actually causes pain in other parts of the body. For example, a trigger point located on your back may cause pain not on the back, but on your neck and head.
